

# Lauderdale County Schools In Partnership with Schneider Electric

In an effort to fund building improvements and improve the learning environment for all students in the district, we have partnered with Schneider Electric to help us implement modern technologies to generate efficiency and enhance our buildings.

## Creating a world-class learning environment

We are beginning a partnership with Schneider Electric that will focus on finding and reducing operational and energy savings for our district. The goal of this partnership is to reduce our operational costs, make necessary enhancements to the learning environment, and modernize our system with new technologies. In addition to these new technologies, the district is adding new air conditioning systems at all seven high school competitive gyms to increase the comfort of occupants.

Starting in January, we will have Schneider Electric teams on site discovering the best solutions to integrate with our system. They will be wearing Schneider Electric gear and appropriate name badges. As you see them, please make sure to welcome them to our Lauderdale County Schools community.

## Our Commitment for 2020

### Upgrade

Upgrade our buildings to create a 21st century learning environment

### Create

Millions of dollars in savings over the life of the project

### Reduce

Reduce energy and operational expenses

We will continue to provide updates throughout the year as the project progresses. Thank you in advance for your participation, and we look forward to the exciting things to come for Lauderdale County Schools!

Life Is On
